SUMMARY

Disciplined BCA final-year student specialising in full-stack web development, AI/ML, and IoT systems. Delivers real-world solutions through deep learning, data analysis, and responsive web technologies. Strong communicator with confident presentation skills, actively seeking opportunities to contribute and grow in a dynamic, industry-leading environment.

WORK EXPERIENCE

-Unity Game Development Intern — WeProvision Infotech, Surat **Feb 2025 – Mar 2025**
Engineered a **Plane Shooter Game in Unity** — gameplay mechanics, real-time physics & interactive UI in a collaborative team; optimised performance and fixed critical bugs.
Gained end-to-end **game dev lifecycle** experience across design, development, testing, and delivery; strengthened teamwork & problem-solving skills.

EDUCATION

-Uka Tarsadia University – BVPICS **Bardoli, India**
Bachelor of Computer Applications (BCA) | CGPA: 8.5 | AI, ML & Deep Learning Specialisation | **2023 – 2026**
-Kendriya Vidyalaya, Silvassa **Silvassa, India**
Higher Secondary (12th) – Science & Mathematics | **2021 – 2023**

TECHNICAL SKILLS

- **Languages:** C++, Java, PHP, JavaScript, Python - **Web:** HTML, CSS, MySQL, AJAX, SEO, Blynk
- **AI / ML:** Machine Learning, Deep Learning, Neural Networks, CNN, TensorFlow, Random Forest, XGBoost
- **Tools:** VS Code, Git, GitHub, Arduino IDE, Android Studio - **Concepts:** DBMS, OOP, Data Structures, Agile, CloudComputing
- **Soft Skills:** Logical Thinking, Analytical Thinking, Technical Documentation, Presentation & Communication

PROJECTS

-LearnX – E-Learning Platform (HTML, CSS, JavaScript, PHP, MySQL)
-Developed a responsive e-learning platform with **role-based access (Admin, Student, Teacher)**, secure user authentication, course management, and interactive learning features.
Designed scalable backend and optimised UI/UX for seamless user experience across all devices.

-RFID-Based Attendance Management System (IoT, Arduino, Blynk)
-Built an IoT-based attendance system using **RFID sensors and Arduino microcontrollers**; integrated Blynk to store, manage, and visualise attendance data in real-time.
-Automated attendance tracking, reducing manual effort and improving accuracy significantly.

-Plant Leaf Disease Detection using CNN (Python, TensorFlow, Deep Learning)
-Trained a **Convolutional Neural Network (CNN)** to detect and classify plant leaf diseases; applied data augmentation to improve model accuracy.
-Delivered real-world agricultural insights using image classification for practical crop disease diagnosis.

-Music Recommendation System (Python, Machine Learning, Random Forest, XGBoost)
-Implemented **Random Forest & XGBoost ensemble models** for personalised song recommendations based on user preferences.
-Improved recommendation accuracy using data-driven approaches and feature engineering.

-Rova – E-Commerce Website (HTML, CSS, JavaScript, PHP, SQLite)
-Independently developed a **fully responsive e-commerce platform** with product listings, cart functionality, and SEO-optimised UI/UX.
-Built end-to-end shopping workflow with clean navigation to enhance user engagement and conversions.

-Stock Market Prediction System (Python, Machine Learning, Time Series Analysis)
-Developed a stock price prediction model using **LSTM & Linear Regression** with historical market data and time series analysis.
-Applied data preprocessing, feature engineering, and visualisation techniques to improve prediction accuracy.

CERTIFICATIONS

-IBM Data Science 101, SQL & Relational Databases 101, IBM **(Mar 2026)** - Data Science Foundations – Level 1, IBM **(2026)**
-JPMorgan Chase & Co. Virtual Internships – Quantitative Research & Investment Banking (Forage) **(Mar 2026)**
-Artificial Intelligence & Machine Learning – IBM / Microsoft / Google **(2025–26)** - Deep Learning Certification **(2025–26)**

AREAS OF INTEREST

-AI & Machine Learning • Deep Learning • Full-Stack Web Development • Data Analysis • Software Engineering • UI/UX Design
